Smart Factory KPI Monitoring Dashboard

A simulated MES-style manufacturing analytics dashboard for monitoring OEE, yield, UPH, downtime, and defect performance.

1. **Factory Overview** 2. OEE Loss Breakdown 3. Downtime Root Cause 4. Yield and Defect Analysis 5. Automated Daily Report

Factory Performance Overview

Total Planned Output

1,051,412

Total Actual Output

961,233

Total Good Units

925,356

Total Downtime Hours

1,216.0

OEE

79.75%

Yield

96.27%

UPH

81.8

OEE Trend by Date

Planned vs Actual Output Trend

OEE by Production Line

Yield by Product Type

Downtime Rate by Shift

Portfolio project: Smart Factory KPI Monitoring and Reporting Automation System. Built using simulated MES-style production data, Python, Streamlit, Pandas, and Plotly.
